

LED Upgrade Kit

Three Hole Light Assembly

LED Lighting Upgrade Features

- *20 times more efficient than incandescent lights*
- *Shock absorbent*
- *All equipment and tools for install are included with each kit*
- *Professional electrical install is not required*
- *No wiring or electrical changes needed*
- *Upgrade install takes under 15 minutes per light*
- *Average operating life of 30,000 hours*
- *1 year replacement warranty*

Powerhook® LED Lighting Upgrade

Converting your current Powerhook® light assembly to highly efficient LED light is now as easy as changing the bulbs.

LEDs are known for economic operation and reliable long life. They do not use filaments like standard light bulbs, making them less susceptible to the shock and vibration prevalent at a loading dock. LEDs use less than one- 50th the amount of electricity as a flood style light and are designed to last as long as 30,000 hours.

Now you can upgrade your current Powerhook® restraint light fixture to all LED operation without the need for an electrician or costly electrical work.

Our LED upgrade kit contains all of the necessary equipment to convert your current older style fixture to LEDs in the time it takes to change the bulbs. The kit comes complete with specially designed LED lighting arrays which contain 18 LEDs in each lamp. The kit also includes a LED diffuser which protects the LED's from theft and accentuates their brightness. Each lamp consumes a mere 1.2 watts of power compared to the 80 watt or 100 watt light which was original equipment with this fixture. Each lamp is under warranty for one year.
