

Wheel Chock Cradle

Wheel Chock Cradle, Chock and Chain in Use

Wheel Chock Cradle

- *Stores wheel chock and chain off ground*
- *Works with any style wheel chock*
- *Powder coated safety yellow*
- *Designed to drain water*
- *Quickly mounts to foundation wall*
- *Prevents snowplow damage and removal of chock and chain*
- *Increases life of chock and chain*
- *Prevents theft*

Wheel Chock Cradle

The wheel chock cradle can be added to any dock foundation wall to hold and protect the chock and chain while not in use

The Allied Solution wheel chock cradle prevents the damages and loss associated with leaving wheel chocks lying around the loading dock drive approach.

The wheel chock cradle conveniently stores both the wheel chock and chain off of the drive approach away from snow plows, sweepers and trucks that can rip them from the wall and displace them away from the dock.

The wheel chock holder stores and protects the wheel chock and chain in a convenient, easy to find location. The cradle is designed to work with all wheel chock and lanyard styles. The unit can be mounted to the dock wall in under 10 minutes.
