

Fairborn[®]

EQUIPMENT COMPANY INC.

RYTEC High-Speed doors offer improved vehicle flow in high-traffic areas and are designed to handle the rigors of opening and closing thousands of times a day, day after day.

Your products are the only things that should be moving in and out of your facility, not expensive heating and cooling costs. **RYTEC** High-Speed doors offer freedom of movement in a climate-controlled environment.

RYTEC High-Speed doors come with full-width, replaceable PVC window panels allowing for greater visibility. And, when accidents do happen, Quick-Set,[™] Break-Away[™] tabs allow the bottom bar to be reset without tools in just seconds, virtually eliminating door downtime.
